Director General's Message

During the month of November, the capacity building activities in the form of short courses, continued at the Centre. Training courses carried out during the month were exploration and mineral targeting, spectrometric methods, analysis of gold and other precious metals, sampling and preparation of geological materials for laboratory testing, and mineral exploration and practical resource estimation.

The first training of the newly launched short courses on petroleum geosciences in collaboration with an Egyptian Petroleum Consulting Company called EREX was scheduled for the 17-21 December 2018. This first course was highly promoted through different media to attract participants to these new courses.

The ACP-EU Development Minerals Programme activities run by the Geo-information Department of AMGC continued and during the month. The validation workshops for the Return to Work plan activities were carried out in Guinea and Uganda, the two focus countries of the programme.
